____ INDIAN GOVERNMENT.—The Slauda & thinks the true lesson to be gathered from our experiments in governing India is apt to e overlooked by those who confound the English system with the English principle of rule. The English system is false, cumbrous, complicated, unsuitable to the character of the people, and very often oppressive. in its effects. The English principle, as administered in the native way-that is, in the primitive, ustand, simple way, not poenliar to the untives of India, but eneval with society itself and of universal prevalence—is cound. Just, and always successful. Lord Cranborne was near the mark on Friday night when he sug-gested that this true principle of Indian rule was despotism; and that the fault has been that the despotic power in India has been too much hampered by regulations. Government in India cannot be too simple, direct, and personal. A mild, patriarchal despotism, based on the principle which all Asiatics are quick to appreciate-justice-is the true system of government for India : but it is a system which is only to be safely administered by Englishmen. All our greatest triumphs of government in India-such as the government of Sciede by Napier, of the Punjamb by the Lawrences of Mysore by Mark Cubbon, of the Bheels by Outram, of Russthan by Tod. of the Rajpoor states by Henry Lawrence, of the Coles by Macpherson -have been won in the practice of this kind of despotism. In every instance of failure the failure has happened through overlegislation and a too minute and intricate systein, which the natives are atterly anable to
